I may not be the most experienced developer that you will interview, but the one thing that you can guarantee is that there is nobody that you will interview that will work as hard to develop his/her skills every day, play nicely with other developers, and isn't so narrow minded in problem solving that he/she isn't willing to try new novel ideas. When you hire me you will rest assured that you won't have to micromanage me, you don't have to extinguish fires, and in one year, I will be one of your most valuable employees. I am at a point in my career where I want to be surrounded by a team that I can grow with and I have chosen your company for this specific reason. You have probably had similar experience in your career when one company allowed you to really have an impact. I am at that stage now, and I look forward to be part of this team. Thank you.
